A Woodland Experience where East meets West

Rooted in a commitment to nature conservation, the Garden highlights two global biodiversity hotspots - East Asia and California - offering a distinctive experience and underscoring our connection to plants and animals.

Always in Season, for Everyone

California’s seasons may be subtle to some, but the Garden’s Asian and California woodlands offer spectacular spotlights throughout the year. Whether it’s winter’s Magnolia Magic, Spring in Bloom, Summer in Blush, or Fall for Color, the Garden offers a different experience - every season, every time, for everyone.

Follow us on social media for the latest on what to see during your visit.

Follow the Mile Loop for a leisurely walk through the Garden and find the perfect picnic spot.

Add a short hike to the highest point to see expansive views of Sonoma Valley.

Note, the Garden was a quarry and has naturally varied topography. There is a significant slope between the arbor and the parking lot. For a more gradual grade, use the California Oak trail.

Through careful cultivation of the rare and endangered plants in its living collection, and partnerships with other botanic gardens and researchers, the Garden is a unique, tranquil, immersive place of conservation in action, all year round.

Connect with us through social media, email, or in person - we’d love to hear from you!

Sonoma Botanical Garden is a 501(c)(3) nonprofit. We rely on donations, memberships, and admission fees to keep the Garden healthy and thriving. Support the Garden at sonomabg.org/give.
Gravel Trail
Stairs
Mile Loop
Foot Bridge
Green paths may be slippery and may not be suitable for all guests.

STURDY SHOES with good tread are recommended for most trails.

STAY ON THE PATH to help protect our conservation collection of rare and endangered plants.

STAY SAFE
We share the Garden with animals like rattlesnakes and mountain lions. Please give them space.

SERVICE ANIMALS ONLY
Please leave pets at home. Cracking your car windows does not keep your pet safe. When outside temperatures are only 70°F, it can reach 100°F in your car in just 20 minutes.
